SAUNA
WORLD

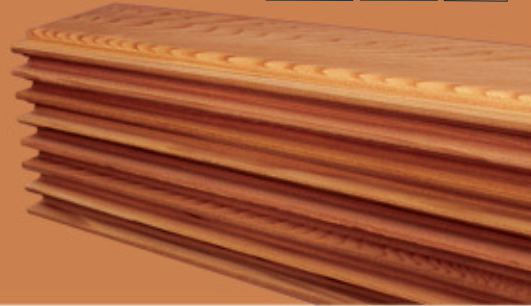

CEDAR PANELS

Western Red Cedar wood is valued for its unique appearance, aroma, and its high natural resistance to decay. Highly recommended for house interiors and saunas.

Sawo selects to use only the high quality Cedar, which don't have any knots or defects.

Profile	Width	Thickness	Length (mm)
STV	106	13.8	1800/2100/2400

Woods with smooth surface and rounded edges.

CEDAR WOOD

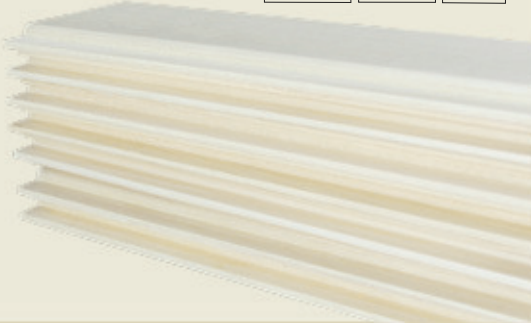

Width	Thickness	Length (mm)
44	22/28	1800/2100/2400
70	22/28	1800/2100/2400
90	22/28	1800/2100/2400

ASPEN PANELS

Aspen wood is white and soft which is cool to touch and has low flammability. The selected Sawo Aspen does not have any visible knots.

Profile	Width	Thickness	Length (mm)
STV	70	13.8	1800/2100/2400
STV	106	13.8	1800/2100/2400
STV	140	13.8	1800/2100/2400

ASPEN WOOD

Width	Thickness	Length (mm)
44	22/28	1800/2100/2400
70	22/28	1800/2100/2400
90	22/28	1800/2100/2400

SPRUCE PANELS

Spruce is a softwood with uniform grain texture. A durable wood that withstands heat well and is used widely in saunas. Typically spruce wood has some small knots.

Profile	Width	Thickness	Length (mm)
STP	95	13.8	2100
